## PF 700 PORCELAIN WHITE STONEWARE

### PF 700 Porcelain White Stoneware

For some time now we have been asked by our customers to develop a superior, white, porcelain-like clay which is more reliable and easier to work with than a porcelain body.

PF 700 is not as translucent as porcelain. It is, however just as white, has all the qualities of a good stoneware body and produces porcelain-like results at a lower cost.

PF 700 has been formulated from the purest, highest quality white clays to give a porcelain-like appearance but without the difficulties that working with porcelain can create. PF 700 is suitable for throwing, jigger and jollyng, press moulding and modelling.

Firing 1220°C - 1300°C.

**Valentine Clays Ltd**  
*Manufactured in the Heart of the Potteries...*
